## conaito Video2Flash SDK - Video? Anywhere!

Powerful and rapid Video to Flash converting engine for your applications and Websites

The Video-to-Flash Software Development Kit (SDK) provides you a powerful and rapid solution for easily convert almost any popular video formats to Adobe Flash® Video (flv), Adobe Flash® file (swf) and MP4 (H264), ready to publish over the web.

**The conaito Video2Flash SDK enables website operators or desktop application developers to get a complete video processing and hosting solution, enabling them to build their own video sharing sites.** The software can also be used to power video blogging, user-generated content, forums and other social networking activities as well in Online-Flash-presentations and professional Flash content authoring like Trade shows, Conferences, E-learning, Researching, Studies, E-cards and Fun content and many more!

Developer of desktop applications can embed the conaito Video-to-Flash conversion engine into almost any .NET application (C/C++/C#, VB.NET and ASP.NET) or others by using the COM interface (TLB), including applications written in Visual Basic 6, Delphi, ASP, Perl, PHP, Python, and others.

The conaito Video2Flash SDK runs on Windows and comes as a .NET assembly that can be used in any .NET programming language like C# or VB.NET. You can use it with your web applications developed in ASP.NET as well. Conaito Flash2Video SDK also includes a COM interface (as TLB) that can be used from any programming language that supports COM automation, like C++, Visual Basic, Delphi, ASP, PHP, JavaScript, VBScript, etc.

## Key Features

- Convert almost any video to Adobe Flash® Video (flv), Adobe Flash® file (swf) and MP4 (H264)
- Developing server-side and desktop Flash video encoding applications and Websites
- Supports the conversion of AVI (DivX, XVID), MPEG (1, 2, 4), MP4, 3gp, 3gp2, ASF, WMV, RM, RMVB, MOV (QT), VOB and etc. to Adobe Flash® Video (flv), Adobe Flash® file (swf) and MP4 (H264)
- Flash video output is fully compatible with Adobe Flash Player 8 or later
- Lets site visitors upload videos and encode it server-side
- Convert video to Flash, Flash video and MP4 (H264) in batch mode
- Faster conversion speed and higher quality than other Flash Video Encoder or Video to Flash Converter
- Supports popular .NET languages environment: C/C++/C#, .NET (Visual Basic), ASP.NET and scripting languages environment (COM interface as TLB), Visual Basic, Delphi, ASP, Perl, PHP, Python and others
- Completely samples for various programming languages (VB.NET, C# and ASP.NET)
- 

... and much more!

The converted Flash video works and looks like your video PLUS all the advantages of a Flash file (already available in 98% of all Web browsers):

- Easy online-distribution or CD
- Greater Accessibility
- Extensive Compatibility
- Low file size

- Resolution friendly
- A safety and tamper proof format
- Streaming technology
- Viewing with or without Player

#### **Potential applications of conaito Video2Flash SDK:**

- Online Collaboration. Applications for online sharing of Video´s.
- Web-based Authoring Tool which nearly works like Acrobat Connect Professional®.
- Learning Management Systems (LMS)
- Web Seminar. Application for presentation of video shows (converted to Flash, Flash video).
- Desktop applications, say authoring tools.
- Web server, say video server platforms.
- And much more!

Please, don't hesitate trying our Video2Flash SDK at once and get yourself, as well as your customers, the exciting experience of easy, fast and high quality standard applications which can convert video into Flash.

#### **Development environment**

The conaito Video2Flash SDK runs on Windows and comes as a .NET assembly that can be used in any .NET programming language like C# or VB.NET. You can use it with your web applications developed in ASP.NET as well. Conaito Flash2Video SDK also includes a COM interface (as TLB) that can be used from any programming language that supports COM automation, like C++, Visual Basic, Delphi, ASP, PHP, JavaScript, VBScript, etc.

The contents of conaito Video2Flash SDK and the supported development environments include all of the necessary software components for building systems based on conaito Video2Flash SDK including documented operational software applications, player and examples (with source code), explanations as well as necessary service programs, libraries and components.

The supported development environments include:

- \* Visual Basic .NET
- \* Visual C++ .NET
- \* Visual C# .NET
- \* ASP.NET
- \* ASP, JSP, PHP
- \* Visual Basic
- \* Visual C++
- \* Borland Delphi
- \* and all development environments with command line support

End user system requirements:

A web browser and the Flash player.

We hope you enjoy the new conaito Video2Flash SDK - Powerful and rapid Video to Flash converting engine for your applications and Websites.
